X LARGE	100-105	85-90	108-113
2X LARGE	105-110	90-95	113-118
4X LARGE	115-120	100-105	123-128

3 Easy Steps to Measure Your BODY

1. Place the measuring tape around the fullest part of the chest, relax the arms at the side of the body. Keep the tape straight and taut (not tight but firm) you are now ready to take the chest measurement.
2. Place the measuring tape around the narrowest part of the waist. You are now ready to take the waist measurement.
3. Place the measuring tape around the fullest part of the hips (usually 20cm/ 8" below the waistline). You are now ready to take the hip measurement.

Some more handy tips...

- Get another team member to take your measurements to ensure accuracy.
- If two out of the three parameters fall within a certain size, that is your size.
- If your measurements are borderline between 2 sizes, go to the lower size for a tighter fit, or the higher size for looser fit.
- When taking your measurements, wear your sport undergarments that you would usually wear when competing in the specific sport.
